

BASIC SCHOOL AGE CARE (BSAC)

BSAC (Online)

The state of North Carolina requires the five-hour BSAC training for school-age professionals who plan and ensure the implementation of daily activities or supervise groups of school-age children in licensed childcare programs. The modules in BSAC will cover the elements of quality care, child development, positive guidance, age-appropriate activities, environmental design, health/safety, nutrition, and NC Child Care Regulations. Students will get the same information as a face-to-face class but through distance learning.
